**Unfulfilled Service Requests (Broadband)  
FCC Form 481, Line 330**

**Detail on Attempts:**

All available HIDS were full at the time the customers requested service. A request was submitted to Engineering for additional equipment. Once the additional equipment was delivered installation of the equipment was scheduled and installed allowing these three requests to be fulfilled.

**Trumansburg Telephone Company, Inc.**

**Service Quality Standards & Consumer Protection Rules Compliance**

**FCC Form 481, Line 510**

The company complies with applicable service quality standards and consumer protections by (1) maintaining and submitting monthly trouble report data to the New York State Public Service Commission (“NYPSC”); (2) reporting major service interruptions to the NYPSC in a manner consistent with its guidelines; (3) filing local service tariffs with the NYPSC and making rate and service information available to the public upon request; (4) clearly listing all charges and credits on customers’ bills; (5) providing full and prompt investigation of, and response to, customer complaints; (6) providing access to enhanced 911 emergency report centers; (7) participating in statewide system for the hearing impaired; (8) complying with federal CPNI rules and other applicable consumer privacy protection requirements, including training of employees that have access to CPNI on the rules and procedures for protecting account information and authenticating callers; and (9) implementing procedures that are consistent with the FTC’s guidance on measures to detect/prevent identity theft (Red Flag).

In addition, the company complies with applicable consumer protections identified in 47 C.F.R. Part 8 for its broadband internet services including, but not limited to, §8.3, §8.5 and §8.7 addressing transparency, blocking and discrimination protections, respectively.

**Trumansburg Telephone Company, Inc.**

**Functionality in Emergency Situations  
FCC Form 481, Line 610**

Trumansburg Telephone Company's central offices are equipped with on-site battery back-up estimated to run 3-12 hours without live power. Additional on-site standby diesel generators are capable of providing standby AC power and have at least a 24-hour fuel supply. Remote electronic cabinets contain battery backup with an 8 hour estimated run time. Larger capacity cabinets (greater than 250 lines) have on-site standby generators, and all cabinets have a generator tap to provide generator capability. In addition to supporting its voice network, the company's emergency generators and/or batteries would also be used to support its broadband network in the event of an extended power outage.

Traffic between Trumansburg Telephone Company's central offices is carried on SONET or other similar ring technology which provides for automatic rerouting of traffic around a failed network path. Outbound trunk groups are provisioned on two disparate paths to Verizon's LATA tandem office.

Trumansburg Telephone Company's trunking is engineered to maintain 50-60% utilization levels during peak traffic periods, which provides enough overhead to handle spikes in traffic due to emergency situations.
